BLUEPEAK TECHNOLOGIES
EMPLOYEE POLICIES HANDBOOK

Sample company policy document for RAG ingestion and testing • Version 1.0 • Effective: 1 January 2026

TEST DOCUMENT
BluePeak Technologies is a fictional company. This handbook is created for software testing and demonstration only; it is not legal advice or an actual employer policy.

1. Working Hours and Attendance

Standard working hours are Monday to Friday, 9:30 AM to 6:00 PM, with a 60-minute lunch break. Employees should inform their manager if they expect to be late or absent. Teams may agree on flexible schedules based on business needs.

2. Leave Policy

Employees should submit planned leave requests through the company's leave system at least three working days in advance where practical. Sick leave should be reported to the manager as soon as possible. Leave approval depends on team coverage and applicable law. This sample handbook does not specify a statutory leave entitlement.

3. Remote and Hybrid Work

Eligible employees may work remotely or in a hybrid arrangement with manager approval. Employees must protect confidential information while working outside the office, use approved devices and networks, and remain reachable during agreed working hours.

4. Information Security

Employees must use strong, unique passwords and enable multi-factor authentication where available. Passwords and authentication codes must not be shared. Suspected phishing, malware, lost devices, or unauthorized access must be reported to the IT Help Desk promptly.

5. Acceptable Use of IT Resources

Company laptops, email, software, and network access are primarily for authorized business activities. Employees must not install unapproved software, bypass security controls, or use company systems for unlawful activity. Limited personal use is permitted when it does not interfere with work or violate security rules.

6. Data Privacy and Confidentiality

Employees should access only the information required for their role. Customer data, employee records, credentials, and internal documents must be shared only with authorized people through approved channels. Confidential information must not be copied to personal storage or public AI tools without written authorization.

7. Device and Software Support

IT support requests should be submitted through the internal Help Desk portal or the designated support email. Include the device name, a short description of the issue, any error message, and steps already attempted. Do not share passwords or one-time codes in support tickets.

8. Password Reset and Account Access

Employees who forget a password should use the company-approved self-service password reset process. If the process fails, contact the IT Help Desk and complete identity verification. IT staff should never ask employees to disclose their existing password or MFA code.

9. Workplace Conduct

Employees are expected to communicate respectfully, avoid harassment and discrimination, protect company property, and follow reasonable workplace safety instructions. Concerns may be reported to a manager or the designated People Operations contact.

10. Incident Reporting

Report suspected data exposure, phishing clicks, lost or stolen devices, suspicious login alerts, or accidental disclosure immediately to the IT Help Desk or Security team. Preserve relevant details and do not attempt to conceal or independently investigate a serious incident.

11. Equipment Return and Offboarding

When employment ends or a device is replaced, employees must return company equipment and follow IT instructions for transferring business files. Access may be disabled as part of the offboarding process. Company data must not be retained after authorization ends.

12. Policy Questions and Updates

Questions about this handbook should be directed to People Operations or the IT Help Desk. BluePeak Technologies may update these sample policies as business needs change. The latest approved internal version, if any, would take precedence over this test document.
